

Reliability, safety and ease:
a better outcome.

Hill-Rom

Enhancing outcomes for patients and their caregivers.

THE HILL-ROM DIFFERENCE

At Hill-Rom, we bring a rare combination of strengths to everything we do. Our stretchers are a great example of what makes us unique.

Portfolio

As the industry leader in hospital beds, we've applied innovative technology to a variety of settings across the healthcare spectrum. Our stretchers begin with the reliable engineering you expect from Hill-Rom, but they are configured to meet each care area's unique needs. They have all the features you need, and none you don't.

Connectivity

We believe in connecting people, process, and product in everything we do. With this in mind, we've designed our stretchers from a holistic perspective, ensuring that they work seamlessly with other Hill-Rom® safe patient handling products like lifts and stretcher boards.

Outcomes

Hill-Rom is dedicated to helping customers achieve a better outcome, and stretchers are no exception. Whether it's requiring less deployment force or making patient ingress and egress easier, our stretchers are always built with a positive clinical result in mind.

A UNIQUE APPROACH

Stretchers can be the unsung heroes of the healthcare environment. They take a beating in the toughest conditions, but still do their job reliably and without fail. Without seeking the spotlight, stretchers play a pivotal role in helping you deliver the best patient care.

At Hill-Rom, we believe in the importance of stretchers. But we see reliability as only part of the equation—making a difference in caregiver safety and ease is just as critical. So we've designed our family of stretchers to meet unique caregiver needs across a

variety of settings, from procedural and transport to OB/GYN and surgical. The result—a safe, easy stretcher experience—is a better outcome for everyone. With stretchers from Hill-Rom, you'll see the results. But you'll feel the difference.

THE INDUSTRY'S MOST EXTENSIVE STRETCHER PORTFOLIO

Whatever your clinical need, we have a stretcher to meet it—
and help you achieve a better outcome in the process.

INTELLIDRIVE® SYSTEM

FEEL THE DIFFERENCE IN:

CAPACITY

Hill-Rom is the only hospital stretcher company to offer a 700-pound weight capacity for all of its stretchers. This versatility makes Hill-Rom's stretchers perfect emergency stretchers, able to handle almost any circumstance.

STABILITY

An industry first, our Auto Contour™ Feature allows automatic rising of the knee section as the fowler is raised. This helps minimize patients slipping down the mattress and minimizes patient repositioning.

SAFETY

Our BackSaver Fowler® Feature uses the patient's own weight to help you raise and lower the head section of the stretcher easily and comfortably.

EASE

Thanks to foot pedal deployment on our powered stretcher, it's never been easier to get moving.

CONTROL

A convenient hand brake helps you negotiate ramps and corners without using your body weight, resulting in safe and easy stops.

CONVENIENCE

Another industry first, our Integrated IV Stand Transport Device helps promote proper ergonomics when using the stretcher with an IV stand and emergency room equipment.

SERVICE

Our hospital stretcher service warranty is backed by staffed service centers located throughout the country.

ACCURACY

Our highly accurate built-in scale displays both pounds and kilograms simultaneously, eliminating the need to toggle between the two.

700 POUNDS
THE INDUSTRY-LEADING CAPACITY
OF ALL HILL-ROM® STRETCHERS

THE DIFFERENCE IS IN THE DETAILS

Every stretcher in our portfolio contains special features to ensure a better outcome whenever possible.
