

Hill-Rom®

Contour™ Headwall System

The new Contour headwall from Hill-Rom: Clean, ergonomic design, clinically flexible and visually compelling

When was the last time you could say that about a headwall?

Clean, Ergonomic Design

- Gases, electrical outlets, data and nurse call in the ergonomic strike zone
 - No bending or reaching

Clinically Flexible

- Enough gas (8), data (5), electric (11), plus nurse call to meet all acuity level needs
 - ICU
 - Med-Surg
 - PACU
 - ED/Trauma
 - Labor and Delivery
 - Patient Rooms
- Vertical equipment management tracks allow you to manage all your equipment needs
 - Optional horizontal equipment tracks available
 - Optional GCX Track for monitor
 - Optional pod-mounted Stat clock

Visually Compelling

- Available in warm white, with virtually any laminate option to meet your room's aesthetic needs
- Recessed to take focus off of the headwall and place it where it belongs, on the patient
- Less impact on the space of the room

At a glance

- Offers a sleek, trim look that promotes a more hospitality-driven design
- Recessed into wall to limit impact on room space
- Tested to ensure it meets safety and quality standards
- Can install before or after drywall, thus offering greater flexibility and reduced opportunity for damage to product

Hill-Rom®

Enhancing Outcomes for Patients and Their Caregivers.™
