

The NaviCare® WatchChild® Solution

Neonatal Solution

Did you know?

- Nurses spend 3 hours per shift charting and documenting¹
- More than 1.5 hours per shift is spent communicating with care team and other departments¹
- Hospitals spend \$50 billion annually on documentation inefficiencies²

The delivery of a newborn child is one of the most cherished moments in a family's experience. At Hill-Rom, we are committed to providing the most complete and comprehensive neonatal clinical solutions.

Our solution allows access to patient information when and where it's needed to help support safe, efficient and effective care delivery. We have infused the latest technology with years of clinical IT experience and input from Neonatologists, Pediatricians and Clinicians to deliver the Neonatal Solution of the NaviCare® WatchChild® Solution.

Support Basic Newborn Care through Level III Neonatal Intensive Care Units

- Separate maternal and infant records provide a complete perinatal history, admission notes and automatic calculations.
- Multiple flowsheet configurability provides timely flow of critical information enabling a faster response to patient events to help improve outcomes.
- Family education tools to assess, track and record education on a continuous basis and prepare parents for care planning upon discharge.
- Standard to advanced report generation for specific reporting needs and resource planning.
- IT interfacing provides seamless connectivity to EMRs and other ancillary applications.

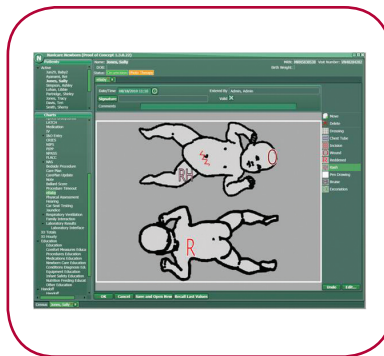

Hill-Rom

Enhancing Outcomes for Patients and Their Caregivers.™

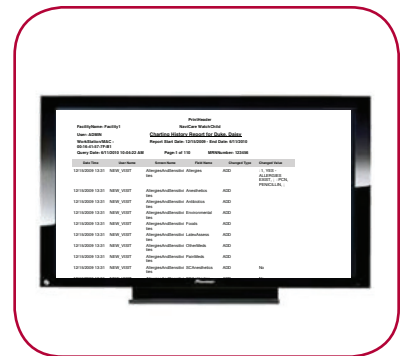

How it works

**Automatic data transfer
to newborn record**

**Chart, calculate
and document**

Generate reports

1. Automatically populates the infant's record with relevant maternal and delivery information.
2. Captures critical information providing advanced practice capabilities throughout the continuum of care.
3. Patient information is exchanged without interruption from one point of access to another reducing redundant documentation requirements.
4. Advanced reports generated to data specific clinical assessment or compliance reporting.
