

NaviCare® Wireless & Integrations

Instant Communication and Real Time Information

Hill-Rom's Wireless & Integration portfolio offers integrated and validated partner solutions, including Ascom and Emergin. These end-to-end product and service offerings provide clinicians with instant communication, real-time information, and consolidated alerts and messaging. Offering extended value, Hill-Rom is the single point of contact for sales, support, service and warranty, with one team working in concert to integrate the health care enterprise.

Why choose Hill-Rom for wireless and integrations?

The most experienced wireless solutions provider

- One of the largest wireless communication system installers and trainers with over 120 wireless systems installed and over 300,000 health care professionals trained
- Ascom strategic certified Gold Level partner
- The only authorized reseller for Cerner
- Dedicated professional services team of project managers, network engineers, and service technicians trained and certified for wireless
- Single point of contact for sales, service, and support—all from one of the most trusted names in health care

Hill-Rom reserves the right to make changes without notice in design, specifications and models. The only warranty Hill-Rom makes is the express written warranty extended on the sale or rental of its products.

Clinical Excellence - The Most Clinically Focused Wireless Reseller

- A team of Clinical Application Specialists (RNs) delivering clinical user training to ensure successful implementations and care process improvement.
- Focused solely on health care, leveraging Hill-Rom's nearly 80 years of clinical expertise.

Wireless Communications

Ascom offers in-building wireless telephone and messaging systems with more than 70,000 customer sites worldwide. The **Ascom FreeNet VoWiFi system** consists of health care specific WLAN handsets, a robust messaging system and supports IEEE 802.11b/g/e/i standards. Ascom also offers the **FreeSet IP-DECT system**, which utilizes industry standard TDM and VoIP telephony interfaces to provide a fully integrated wireless communication platform.

System Integrations (Messaging)

Smart integration provided by the Linux based **Ascom UNITE Messaging Suite** optimizes workflow and existing investments by seamlessly integrating with security, inventory control, fire, HVAC and other systems.

The **Emergin Integration Suite** consists of an Event Service Bus to help enterprise organizations create a standards-based infrastructure, with adapters and toolkits available to integrate legacy applications, service components, and any third party wireless devices.

Cerner provides a medical device connectivity suite to enable medical device management and EMR integration.
