

Easy connectivity = improved patient safety and more time for patient care

- Using a standard 37-pin connector, Hill-Rom beds can send bed data where you need it quickly and easily.
- The Advanta™ 2 bed is one of six network-ready, Cerner-certified frames from Hill-Rom.
- Hill-Rom® beds can share up to 30 data points with nurse call systems or electronic medical records for easier documentation and protocol compliance.
- Smart beds, wise investment — one company, one fully-integrated solution.

Easy, Safe, Proven Connectivity

The Advanta™ 2 bed provides data at the bedside or sends it to any nurse call system, to wireless devices or to the hospital network.

Best in class connectivity solutions

Better connect your patients, caregivers, beds, devices and IT systems with proven integrated solutions to help reduce adverse events and give time back to your caregivers.

Connect at the bedside (Local alerts)

- Point-of-Care® alarms to alert caregiver to unsafe conditions ranging from bed height and brakes not set
- New SafeView™ alerts provide immediate visual indicator of patient safety protocol at the bed level

Connect at nurses' station

- Automatic activation of bed safety protocols and to ensure patient safety and reduce nurse workload
- Real-time whiteboard display of bed safety protocol compliance to enhance patient surveillance
- Historical reports and trending at a touch of a button

Connect with caregivers

- Intelligent, precise alerts sent directly to the patient's caregiver improves nurse response time by more than 90% (39 seconds versus 9 minutes, 30 seconds)*
- A quieter environment—94% reduction in overhead pages
- Immediate notification to nurse

Connect with hospital information systems

- Hill-Rom is the first company to send data from bed directly for the EMR eliminating documentation steps and time
- Reported successful integration with hospital IT increases core efficiency, reduces nursing workload, and removes the opportunity for error

At a glance

- Reduce the workload of the nurse
 - Eliminate steps
 - Automatic protocols
 - Speed communication
 - Decrease relevance on an overloaded memory system
- Increase time for direct care
- Heighten the patient experience
 - Enhanced comfort
 - Increased responsiveness
 - Improved surveillance

Comprehensive connectivity platform poised to grow with your needs, now and in the future.

* Average Response Time for Nurse Dispatch of 9.5 minutes/direct to caregiver of 39 seconds. *Best Practices for Health Technology Management – December 2006, www.ecri.org.*
