

### Introduction

Hill-Rom, an innovator in patient care technology, now offers online product-specific training through HealthStream or your Learning Management System that helps maximize the benefits of our products. These online product courses offer engaging patient stories, realistic bed simulations and active participation, giving you the same high standard of in-person courses, but from the location of your choice. These courses not only teach how to use each product and their features, but why the features are important in enhancing patient outcomes and keeping caregivers safe.

### Key Benefits

The following are key benefits of the Hill-Rom eLearning courses:

- Web-based; accessible 24/7
- Delivers consistent training from person to person
- Innovative interactive story-telling approach to eLearning
- 30 minute product training modules
  - Incorporated skill checks for each critical topic
  - Provides immediate access to valuable resource documents
  - Includes realistic, interactive bed simulations
- Courses can be completed in convenient segments
- Delivered via multiple methods
  - Online
  - Your LMS or Intranet
  - Stand-alone Computers
  - HealthStream

### Course Offering

The following courses are available immediately:

1. **VersaCare® bed eLearning v1.0** - This course will help you to fully understand the operation of Hill-Rom's VersaCare A.I.R.® bed (revision A through F) and the many unique safety features it offers you and your patients. (Applicable for VersaCare A.I.R.® beds and VersaCare® beds manufactured before April 2008 with any of the available mattresses.) In addition to learning about the basic functions of the bed, the course includes instruction on Chair position, scale operation, bed exit operation, lockouts, CPR, and FlexAfoot® mechanism. It also provides instruction on the powered air system including Turn Assist and Max Inflate.
2. **VersaCare® bed eLearning v2.0** - This course will help you to fully understand the operation of Hill-Rom's VersaCare® bed (revision G and newer) and the many unique safety features it offers you and your patients. (Applicable for VersaCare® beds manufactured after April 2008 without the powered air mattress) In addition to learning about the basic functions of the bed, the course includes instruction on Chair position, scale operation, bed exit operation, lockouts, CPR, BOOST® position and FlexAfoot® mechanism.
3. **VersaCare A.I.R.® bed eLearning v2.0** - This course will help you to fully understand the operation of Hill-Rom's VersaCare A.I.R.® bed (revision G and newer) and the many unique safety features it offers you and your patients. (Applicable for VersaCare A.I.R.® beds manufactured after April 2008 with the VersaCare A.I.R.® mattresses) In addition to learning about the basic functions of the bed, the course includes instruction on Chair position, scale operation, bed exit operation, lockouts, CPR, and FlexAfoot® mechanism.
