Delivering MetaTherapy® Treatment through The MetaNeb® System
MetaTherapy® Treatment

MetaTherapy® Treatment maximizes efficiency for patients and clinicians by combining lung expansion, secretion clearance and aerosol delivery into a single integrated therapy cycle. May reduce therapy time to just 10 minutes,* and eliminate the need to switch devices.

Benefits of MetaTherapy® Treatment

- May save time for patient and clinician
- Introduces CHFO therapy immediately after lungs have been expanded through CPEP
- Integrates aerosol delivery of medications for maximum efficiency

* Therapy times may differ depending on patient needs and ordered therapies.
The MetaNeb® System

The Convenience of MetaTherapy® Treatment Delivered through a Single Unit

- Simple “connect and go” design
- Single patient use (SPU) circuit includes mouthpiece, nebulizer, mask/trach adapter, and in-line ventilator setup
- Quickly switch between therapy cycles
- Easily adjustable flow, pressure and percussive rate

Delivery Options

- In-line ventilation
- Mouth piece
- Face mask
- Tracheostomy

Conditions for MetaTherapy® Treatment

- Chronic obstructive pulmonary disease (COPD)
- Post-operative airway management
- Bronchiectasis
- Neuromuscular disorders
- Cystic fibrosis
- Asthma
- Emphysema
- Reversal of atelectasis
- Chest wall trauma
Hospital-to-Home Continuity of Care

Hospitals are looking for effective continuum of care solutions to get patients healthy in the acute care setting and stay healthy after they return home. The MetaNeb® System can be part of that solution, along with another proven Hill-Rom solution: The Vest® Airway Clearance System.

1. **Respiratory Care**
   - Patients receive therapy with The MetaNeb® System or The Vest® System.

2. **Stabilization**

3. **Discharge**
   - Improve airway clearance to reduce the risk of rehospitalization with home use of The Vest® System.¹

The MetaNeb® System and The Vest® Airway Clearance System both are proven therapies for airway clearance.
The Vest® Airway Clearance System

The Vest® System is designed to assist patients in mobilizing retained secretions that can otherwise contribute to increased rates of respiratory infection, reduced lung function and costly re-hospitalization.

Designed for both hospital and in-home use, The Vest® System can be an effective home-care regimen for patients who have been using The MetaNeb® System in the hospital.
