

Evidence-based Design Services

to help create your Intelligent Patient Environment

Enhancing outcomes for patients and their caregivers:

Considering new construction, expansion or renovation?

Designing your optimal patient care environment is no easy task. Let Hill-Rom's EDAC-certified professionals assure your cross-functional design team develops an intelligent patient environment. Our RoomBuilder® workshop utilizes an evidence-based design process that focuses on safety, efficiency, and budgetary concerns to optimize outcomes.

What is RoomBuilder® Design Service?

The RoomBuilder® design workshop is where you and your design team can explore, experiment, visualize and validate design decisions that surround and encompass the patient room environment.

The RoomBuilder® Design Service team features EDAC certified and licensed health care designers with over 40 years of combined design experience. Let Hill-Rom facilitate your discovery of a better design solution for your patients, caregivers, facility and health care system.

Hill-Rom's intelligent patient environment

Hill-Rom believes the patient environment and equipment must work together with the caregivers to achieve better outcomes. Hill-Rom takes a systems approach to provide a comprehensive package that combines and connects people, processes and technologies. Our EDAC certified Design Consultants strive to help you create your unique Intelligent Patient Environment.

The Intelligent Patient Environment

The Intelligent Patient Environment uses an integrated approach to intelligently design and equip a patient room to
ENHANCE OUTCOMES FOR PATIENTS AND THEIR CAREGIVERS.

RoomBuilder® Evidence-Based Design Process

Focus

- Participants focus on the key challenges of their specific patient room design
- The RoomBuilder® Program encourages the interaction between all stakeholders during the problem-solving design process

Experience

- In the mock-up lab, customers can walk through and physically experiment with their designs before actually implementing them
- Hill-Rom's mock-up lab is furnished with hospital equipment and architectural props that can be easily reconfigured

Explore

- Real-time CAD-based design makes rapid experimenting easy and efficient
- Multiple options are explored and evaluated
- Optimize your patient room design to provide the best care possible

Validate

- RoomBuilder® Design Service helps hospitals save time and money by discovering room hazards and design issues prior to construction
- Architects and designers are using RoomBuilder® Design Service to rapidly test and validate evidence-based design concepts

"I enjoyed the speed at which items could be moved so we could visualize the room setup and change it again and again."

– **CHIEF NURSING OFFICER**

"It was great to give the client a chance to see their space populated with actual equipment. There is nothing like walking into a drawing!"

– **PROJECT ARCHITECT**

"The RoomBuilder® program gave us the ability to lay out the entire room and discover what works and what doesn't work."

– **FACILITIES MANAGER**

Hill-Rom is a leading global medical technology company with approximately 10,000 employees worldwide. We partner with health care providers in more than 100 countries by focusing on patient care solutions that improve clinical and economic outcomes in five core areas: **Advancing Mobility, Wound Care and Prevention, Clinical Workflow, Surgical Safety and Efficiency, and Respiratory Health.** Around the world, Hill-Rom's people, products, and programs work towards one mission: **Every day, around the world, we enhance outcomes for patients and their caregivers.**

Hill-Rom reserves the right to make changes without notice in design, specifications and models. The only warranty Hill-Rom makes is the express written warranty extended on the sale or rental of its products.
